REACH SVHCs (per EU Regulation EC1907/2006)

EU REACH SVHC – EU Regulation (EC) 1907/2006, Article 59 (10)

The manufacturer has reviewed the REACH Substances of Very High Concern (SVHC) Candidate List published as of June 10, 2022 and confirms that none of the 224 substances are intentionally added to the product above the 0.1% threshold.

The plastics PET polymer used to produce staple fiber required in the manufacturing of the nonwoven material does contain cobalt diacetate. The cobalt diacetate is utilized in the polymerization process as an additive and contains 42ppm (0.0042wt%) of the substance which is much less than the 0.1% (w/w) requirement for reporting established by the European Chemical Agency (ECHA) for REACH.

California Proposition 65

The Wipers described above do not intentionally contain any of the chemicals listed by California Proposition 65, December 31, 2021. However, Acetaldehyde is produced as a by- product of the polymerization process in the production of staple fiber required to manufacture the nonwoven material. Also, the staple fiber finish oil does contain <2 ppm Diethanolamine.

RoHS 3 Compliance Statement

The Wipers described above do not contain any of the below substances above the maximum concentration values identified in Annex II of the RoHS Directive (2011/65/EU) and its amendment (EU) 2015/863, unless using an exemption as those listed in Annex III and IV.
